Mater Misericordiae University Hospital

Welcome

Our Lady's Ward is a 31 bedded Inpatient Ward specializing in the care of acute gastrointestinal and respiratory patients and other general medical conditions including palliative care.

This is a fast paced, high turnover ward dealing with complex medical needs and treatments.

Our Lady's Ward was the first ward to use the Early Warning Score and Compass Course (Acute Life Threatening Event Recognition and Treatment) and assesses all patients this way in order to optimize wellbeing, prevent any deterioration and decrease transfer to critical care areas. All nurses are ensured a place on this course and a follow-up mentoring session at ward level.

The cornerstone of the care given on Our Lady's Ward is the promotion of nurses to diligently assess, plan and implement appropriate care in all of the patients under their care and recognize the priceless asset each and every nurse is to this system.
