1. **JOB PURPOSE**

To provide optimal nursing care to patients with Pulmonary Hypertension. This encompasses families and carers; including psychosocial assessment, crisis intervention, counselling, supportive therapy, behaviour modification, care management and patient education. In collaboration with key stakeholders the post holder will participate in the implementation of the National Clinical Care Programme objectives.

2. **PRINCIPAL ACCOUNTABILITIES**

2.1 Clinical Focus

**Direct Care**
- Work with ward staff in the assessment, planning, implementation and evaluation of nursing care to patients with Pulmonary Hypertension to increase health gain and quality of life.  
- Promote a therapeutic safe care environment which maintains and supports patient dignity, respect, privacy and independence.  
- Ensure hospital policies and procedures and national guidelines pertaining to this patient cohort are followed.  
- Initiate treatments according to agreed protocols and within agreed time parameters.  
- Provide specialist advice and guidance to those with concerns relating to condition and treatment.  
- Educate in relation to options of care and treatments available.  
- Provide face-to-face & telephone advice, for patients with queries relating to their diagnosis, treatments, and or services available.

**Indirect Care**
- Establish clear referral patterns to, and lines of communication with the multidisciplinary team and relevant professionals (e.g. general practitioners, public health & practice nurses) and act as an expert practitioner to seek improvements in care.  
- Contribute to the planning and organisation of patient clinics within the hospital setting +/- community units.  
- Develop a network of contacts and communication links with other professionals in this specialised field.  
- Assist ward based staff with discharge planning arrangements.  
- Be actively aware of current procedures, policies and standards in relation to care and contribute to formulating +/- updating these.  
- Contribute to team discussions regarding admissions and treatment priorities. Coordinating investigations, evaluating and following up on clinical care issues within agreed timelines.  
- Demonstrate knowledge of risk management issues, identifying risks and implementing safe practice standards.  
- Know the HIQA Standards as they apply to this role. Eg. Standards for Healthcare, National Standards for the Prevention and Control of Healthcare Associated Infections, Hygiene Standards etc.
### 2.2 Patient Advocate

- Be a patient/staff advocate at professional and patient interest group meetings and represent their concerns, issues, decisions.
- Assist in meeting the psychological, emotional and informational needs of patients and their families at the time of diagnosis and throughout treatment.
- Demonstrate effective communication skills and convey information as appropriate with patients, families/carers.
- Be a first line contact to staff with queries relating to care of patients with Pulmonary Hypertension and promote the concept of best practice.

### 2.3 Education and Training

- Plan, co-ordinate and initiate structured and impromptu educational opportunities to facilitate staff development and patient education.
- Evaluate educational needs of patients & staff in conjunction with Ward Manager/Clinical Leads.
- Develop, implement and evaluate teaching packages for patients and their relatives to optimise patient care outcomes. Encourage involvement of family members in the teaching process.
- Attend mandatory training and comply with educational requirements for optimal personal & professional development.

### 2.4 Audit and Research

- Conduct and participate in research and clinical audit to improve standards of care.
- Evaluate the effectiveness of patient care initiatives undertaken and make improvement recommendations.
- Participate in and implement initiatives for streamlining care delivery.
- Contribute to Nursing, Medical and Health and Social Care Professionals education in the care management of this patient cohort.
- Maintain effective nursing records and regularly evaluate these records.
- Continuously self-appraise own work and constantly strive to enhance the quality of patient care.
- Contribute to service development and planning.

### 2.5 Consultative

- The CNS will have detailed knowledge of the care and treatment of patients with Pulmonary Hypertension and related disorders.
- Act as a professional resource to multi-disciplinary team members and other care providers in this specialised care arena.
- Provide a leading role in planning and evaluation patient care.
- Demonstrate commitment to enhancing the quality, efficiency and effectiveness of care.
- Provide a consultation service for patients ensuring privacy and confidentiality at all times.
### 3. GENERAL RESPONSIBILITIES

- Adhere to all hospital policies and procedures.
- Ensure good time management at all times.
- Make viable recommendations for the development of the post.

### 4. GENERAL INFORMATION

**Reporting Relationship**

- Professionally accountable to the Director of Nursing
- Report to the Directorate Nurse Manager and CNM3
- Issues: Consultant(s) in Pulmonary Hypertension

**Hours of Duty**

- Monday-Friday (39hrs/wk)
- Start-Finish times as required necessary to the post (as per Directorate Nurse Manager)
- This post will require travelling to other hospitals with expenses remunerated.

**Annual Leave:** As per national agreement

### 5. KNOWLEDGE AND EXPERIENCE

**EDUCATION**

- A clinical expert through formal qualification (Degree/Masters) and extensive clinical experience pertinent to Pulmonary Hypertension care.

**EXPERIENCE**

- Current Registered Nurse with BACE (Bord Altranais agus Cnáimhseachais na hÉireann).
- Minimum of five years post registration experience in area.
- Post registration qualifications or clinical experience relevant to performing the role of CNM2/CNS (Pulmonary Hypertension care).

**SKILLS/ABILITIES**

- Leadership skills to effectively manage and direct staff and services
- Ability to analyse complex problems and develop practical solutions
- Excellent verbal, written and communication skills appropriate to audience and situation
- Advanced clinical assessment skills and willingness to foster these skills in others
- Experience of working within a multidisciplinary team, with an emphasis on service delivery, quality of care and team cohesion.
- Experience in service development/project management
- Excellent IT skills – Word, Excel, PowerPoint
