Interventional Radiology Nursing

Mater Misericordiae University Hospital

# Welcome

**Interventional Radiology Nurses** are involved in the care of patients undergoing diagnostic and therapeutic procedures using X-Rays, Ultrasound or CT guidance.

Patients referred to the Interventional Radiology Suite may be inpatients or referred from outpatient clinics and attend from all over Ireland.

Nurses work as part of a collaborative multidisciplinary team along with Health Care Assistants, Consultants, Radiographers, Portering and Administration staff.

We aim to provide Safe, evidence based, person centered care to all patients at what can often be a difficult time for patients during their visit to hospital.

The Mater Hospital Radiology Department has been shortlisted for the Irish Radiography department of the year for 4 consecutive years now and was awarded the honour of Radiology Department of the year 2015.

# Opportunities
